Job Description:

Purpose

To provide high-quality wildlife and conservation education to middle school students in the afterschool hours to local students, grades 5-8.

Primary Duties

- Conduct wildlife education programs for students in up to 7 middle schools, grades 5-8.
- Follow provided curriculum for education and hands-on activities.
- Form positive relationships with program participants.

Other Duties

- Attend and supervise periodic field trips during the after-school hours.
- Help assemble and/or pick-up supplies required in the classroom.
- Provide feedback on programming and classroom experiences to Education Coordinator and Executive Director.

Skills/Qualifications

- Knowledge of and high degree of interest in wildlife and native ecosystems
- Willingness to handle live, wild animals (with training)
- Preference will be given to those with wildlife rehabilitation experience
- Cooperation, Teamwork, and Flexibility required

Education & Experience

- Experience working with students in an educational environment
- Experience with wildlife or environmental education, interpretation and/or natural sciences
- Undergraduate degree in education, biology, or environmental science preferred.

Physical Demands

Moderate physical activity required, including carrying supplies (up to 35 lbs) and hiking with students.

School-year programs are conducted in the after-school hours, Monday through Thursday, from late August to late May each year. Summer programs are conducted during the day, Monday through Thursday, from late May through early July. This position is grant-funded, and the schedule and available work hours are variable.

Paid training provided. Periodic staff meetings will be required.

Nebraska Wildlife Rehab, Inc. is an Equal Opportunity Employer. Background checks are conducted on all employees and are a requirement for employment.
