

High School Science Academy

Sponsored by Nebraska Wildlife Rehab, Inc.

What:

The aim of this program is to give Omaha high school sophomores, juniors and seniors the opportunity to participate in college-level lectures and field/lab work. Each month, students will explore a different topic in the biological sciences. They will participate in one full evening of lecture on a weeknight, followed by a half or full-day field or lab session on a weekend later in the month. All sessions will be taught by university professors and biologists, and will be supervised by NWRI's education staff.

Who:

Open to Omaha High School Sophomores, Juniors and Seniors who have a strong interest in biological sciences and would like the opportunity to learn from college professors and biologists on topics in biology.

How to apply: Complete the Student Application and have your science teacher or counselor complete the Recommendation Form and ensure both are submitted to NWRI no later than September 20, 2018. Forms and instructions are online at www.nebraskawildliferehab.org on the Education page. Enrollment is capped at 45 students.

Dates: September 20, 2018 Application and referral deadline
Orientation and dinner mixer September 25, 2018
Two meetings monthly from October through May
Optional summer activities

Summer Options:

5-day optional trip to do field work in western Nebraska
Volunteer opportunities at our Wildlife Center

Transportation to all lectures and fieldwork sessions will be provided when needed. Meals will be served at all sessions
